| Location | Selkirk Technology Access Centre (STAC), Trail BC |
| How to Apply | Submit resume and cover letter as attachments to jtaylor@selkirk.ca by April 6, 2026 |

POSITION SUMMARY

This internship is specifically designed for students enrolled in 4th year or recently graduated from Electrical Engineering Technology, Automation, or a related field.

The intern will work with Selkirk Innovates, the Applied Research and Innovation division of Selkirk College, specifically researchers and engineers at the Selkirk Technology Access Centre (STAC) facility in Trail, BC.

This is a Mitacs Accelerate Internship supporting STAC researchers on an industrial applied research project in partnership with DROP Sprockets. The intern will assist in the electrical modernization of a Bullard 42 Vertical Turret Lathe, supporting integration of modern control systems, sensors, and machine monitoring technologies.

The successful applicant will be required to enroll in Selkirk Innovates' Applied Research and Innovation Internship training program, which currently does not have a fee.

COMMITMENT TO INCLUSIVE EXCELLENCE

The diversity of our workforce is at the core of our innovation and creativity and strengthens our research and teaching excellence. In keeping with our strategic commitment to Diversity and Inclusion, Selkirk College strives to embody the values of respect, collaboration and diversity, and has a strong commitment to employment equity.

Selkirk Innovates seeks qualified candidates who share our commitment to equity, diversity and inclusion, who will contribute to the diversification of ideas and perspectives, and especially welcomes applications from First Nations, Métis and Inuit peoples, members of racialized communities ("visible minorities"), persons with disabilities, women, and persons who identify as 2SLGBTQ+.

MAIN DUTIES AND RESPONSIBILITIES

- Assist with electrical system documentation and modernization
- Support PLC, sensor, and monitoring system integration
- Contribute to testing, validation, and project documentation
- Perform other related duties as requested by the supervisor
- Complete Mitacs Accelerate Internship paperwork and reports

SKILLS, KNOWLEDGE AND ABILITIES

- Interest in electrical systems, industrial automation, or PLCs
- Demonstrated ability to work independently and collaboratively in a research environment
- Strong problem-solving and technical learning ability
- Excellent attention to detail
- Strong written communication skills

- Excellent interpersonal, time management, and organizational skills
- Proven ability to complete tasks under pressure and be flexible
- Ability to prioritize work and meet deadlines

QUALIFICATIONS

- Currently enrolled in final year or recently graduated from Electrical Engineering Technology, Automation, or a related field
- Experience with PLCs, industrial controls, or instrumentation is an asset
